

Hello, I'm Justas Petrulis.

SENIOR WEB UX/UI DESIGNER

I'm a senior UX/UI designer with more than ten years of experience. I like taking something complicated and making it simple to use. I design in Figma and can build what I design in HTML, CSS and JavaScript. Google UX certified, with a background in industrial and brand design.

Skills

UX/UI & WEB

Figma UI/UX Design
Design Systems Prototyping
Wireframing Responsive / Grid
HTML5 CSS JavaScript
Framer Accessibility Usability
Shopify / Liquid
Chrome extensions

DESIGN & BRAND

Illustrator Photoshop InDesign
After Effects

AI-ASSISTED

ChatGPT Midjourney Gemini

IN PROGRESS

Hotjar User research React

3D

Blender CAD Keyshot

Whatever else is needed — can be learned.

More about me

I've been designing for more than ten years. I started in industrial design, spent a long time in branding and print, and now I work in UI and web design.

The way I think stayed the same the whole way through. I start with how people actually use something, then design the simplest version that does the job. I design in Figma and build the front end myself in HTML, CSS and JavaScript, so what I hand over is close to what ships.

I do my best work next to the person who owns the result. I show things early, take the feedback, and keep refining. I also pay attention to the parts that are easy to skip, like accessibility and staying consistent across a lot of screens.

Portfolio

Most of my primary work was done in-house in B2B companies under NDA — happy to walk through the details on a call.

I like building the whole thing

- Logo, brand, campaigns, then the coded website.
- Designed *and* coded a Shopify store (Liquid).
- Building Chrome extensions — public soon.
- Front-end now, backend next.
